

First Aid Policy

2023-24

Date	May 2023
Written by	Vice Principal
Adopted by Longsands Local Governance Committee	18 May 2023
Review Date	September 2024

Health and safety regulations

The Health and Safety (First Aid) Regulations 1981 require employers to provide adequate numbers of First Aiders, facilities and equipment to enable First Aid to be given to employees who are injured or who fall ill at work. These regulations apply to schools in the same way as all other workplaces. In addition, under the provisions of the Health and Safety at Work etc Act 1974, employers have a duty to ensure, so far as is reasonably practicable, the health and safety of non-employees.

Assessment of First Aid needs

The 1981 regulations require employers, in order to decide how to meet their obligations, to make an assessment of the First Aid needs appropriate to the circumstances of each workplace. This assessment will then help employers to determine how many First Aiders are needed and what other First Aid facilities and equipment should be provided. The HSE ACoP advises that, when making this assessment of need, employers should consider workplace hazards and risks, the size of the organisation and the nature and distribution of the workforce, the organisation's history of accidents, the needs of travelling, remote and lone workers and access to the site for emergency medical services.

Making First Aid procedures known

It is vital that all Academy staff know who our First Aiders are and how to contact them and that there are agreed procedures in place for dealing with all kinds of emergencies, including those in isolated areas such as playing fields. This forms a part of our Safeguarding and Health and Safety Training which takes place at the beginning of each academic year. First Aid notices are displayed which give the location of First Aid equipment and the location of key First Aiders.

First Aiders in the Academy

Any member of staff can volunteer to become a First Aider. At Longsands Academy we have a large number of First Aiders, firstly because we operate on a large site with a significant number of students and employees, and secondly because a number of staff, teaching and non-teaching, regularly take students away from the Academy site on trips, visits and sports fixtures.

All of our First Aiders hold a valid Emergency First Aid at Work certificate (1 day course) and our lead First Aider holds the First Aid at Work certificate (3 day course). These certificates are valid for three years and we book training for colleagues when their certification is about to run out. Our site team are trained First Aiders to ensure that there is First Aid coverage before and after the Academy day.

Please see appendix one for a list of current First Aiders.

The main duties of our First Aiders are:

- to give immediate help to casualties with common injuries or illnesses and those arising from specific hazards at the Academy;
- when necessary, ensure that an ambulance or other professional medical help is called.

First Aid Facilities

We have a First Aid room next to our main Administration Department for students to be treated - this has a toilet and hand washing facilities (with hot and cold running water) next door. We also have a further room with a bed where students can lie down if necessary. This room is close to main reception should external medical assistance be required. The main First Aid room has a CCTV camera installed to ensure that students can be monitored if the First Aider needs to leave the room to call parents/carers.

First Aid kits

First Aid supplies are stored in the First Aid room and a mobile kit is also stored here to enable the First Aider on duty to take supplies out to the location of an accident or injury. In addition there are First Aid kits within the main canteen area, and in the main curriculum teaching areas for Science, Technology and Physical Education and further mobile kits for off-site activities.

The First Aid and Wellbeing Officer checks the contents of the First Aid kits regularly to ensure that stock is replenished and that any items which have reached their expiry date are disposed of safely. Medicines and tablets are not stored in our First Aid kits.

Defibrillator

Our Defibrillators are available in three locations: N block therapy room, Main Reception and the Sports Pavilion should an emergency of this nature occur. Cardiac arrest can affect people of any age and without warning; if that happens, swift action in form of prompt defibrillation can help save a person's life. Staff, who volunteer and include our First Aiders, are trained to use the Defibrillator.

Off-site Activities

Mobile First Aid kits are provided for every Academy visit, in addition to any First Aid kits which may be provided by transport companies. These kits are monitored by the First Aid and Wellbeing Officer and the contents vary depending on the type and length of the visit.

Procedure in case of accident, injury, defects or hazards

In case of an accident, the following procedures should be followed:

- The injured party should be seen by a qualified First Aider/Appointed Person
- If the injuries cannot be treated at the Academy, arrangements should be made for transportation to hospital. An Ambulance must be called.
- All injuries must be recorded on an accident form by a qualified First Aider.
- If the accident is as a result of an incident on site, all parties involved and any witnesses need to file an incident report.

Hygiene / Infection Control

All staff should take precautions to avoid infection and must follow basic hygiene procedures. Staff will have access to single-use disposable gloves and hand washing facilities and should take care when dealing with blood or other body fluids and disposing of dressings or equipment. All bodily fluids on the floor will be cleaned up using an absorbent powder, then swept up with a designated dustpan and brush and placed in a secured plastic bag and disposed of appropriately. Bodily fluid spillages on hard surfaces will be cleaned up with paper towels and disposed of in a sealed plastic bag in a yellow hazard bin. The area will be thoroughly disinfected.

Record Keeping

A record of any First Aid treatment given by First Aiders/appointed persons is made on an accident form (which must be kept for three years) and this information is then entered into 'Bromcom'. This includes:

- The date, time and place of incident;
- The name (and class) of the injured or ill person;
- Details of the injury/ illness and what First Aid was given;

- What happened to the person immediately afterwards (for example went home, resumed normal duties, went back to class, went to hospital);
- Name and signature of the First Aider or person dealing with the incident.

Under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995 (RIDDOR) some accidents must be reported to the HSE. The employer must keep a record of any reportable injury, disease or dangerous occurrence. This must include: the date and method of reporting; the date, time and place of the event; personal details of those involved and a brief description of the nature of the event or disease. Please see the following link for accidents which must be reported to the HSE:

[Incident reporting in schools \(accidents, diseases and dangerous occurrences\) EDIS1 \(hse.gov.uk\)](https://www.hse.gov.uk/ed1s1/)

In addition, we are also required to report the following types of incident on the Astrea 'Every' system:

All accidents, incidents and near misses involving employees

- All instances of verbal abuse, aggressive behaviour and violence towards employees
- Any incidents which result in pupils or members of the public requiring further medical treatment (e.g. hospital, GP, Dentist etc.)
- Any incidents which are RIDDOR reportable

As a part of our health and safety policy and annual briefing, all employees are reminded that they are responsible for any defects in the equipment or damage to their classrooms and should report such to the Site Manager. Any damage to the building that could be dangerous should also be reported to the Site Manager immediately.

Special Arrangements

In some cases children with medical needs may be more at risk than other children. We recognise that we may need to take additional steps to safeguard the health and safety of such children. In a few cases individual procedures may be needed and these will be detailed in an Individual Health Care Plan. The First Aid and Wellbeing Officer and Medical Needs TA are responsible for making sure that all relevant staff know about and are if necessary are trained to provide any additional support these children may require with the support of the Head of Year.

Emergency Situations

First Aiders are trained to recognise and respond appropriately to the emergency needs of children with chronic medical conditions such as asthma, diabetes, epilepsy and severe allergic reaction. Students with asthma need to have immediate access to their reliever inhalers when they need them. If a student has forgotten their inhaler, we are able to provide an emergency inhaler as agreed by parents/carers on entry to the Academy. Students with conditions such as epilepsy, diabetes and anaphylaxis will have a plan, discussed with the First Aid and Wellbeing Officer in case of emergency. These students will carry their own medication where necessary unless parents/carers request otherwise and spare medication is also held centrally. If the Academy has to give an injection for anaphylaxis, an ambulance will always be called.

Child Protection

If any concerns are raised that have safeguarding implications (e.g. unexplained marks or scars), whilst a person is being treated for First Aid, the First Aider must inform the Designated Safeguarding Lead who will then take appropriate action.

Physical Contact with Students

The treatment of students for minor injuries, illness or medical conditions may involve members of staff in physical contact with young people. Any treatment should:

- Not involve more contact than necessary
- Be undertaken by staff who have volunteered to be designated to the task
- Be carried out wherever possible, in front of other children or adults
- Be recorded on an Accident Form and recorded in Bromcom
- All parents/carers will be informed if their child has received any treatment at Academy

Review of Provision

The Principal will review this policy and the First Aid provision provided in Academy annually to ensure that these remain fit for purpose.

Links to other policies

This policy should be read in conjunction with the Health and Safety Policy and Supporting Students with Medical Conditions Policy
