

## Longsands Sixth Form: Psychology A-level transition tasks Summer 2024

Welcome to Psychology at Longsands Sixth Form

The tasks on this worksheet have been designed to help you in your transition from your Year 11 study to the requirements that will be expected of you in Year 12. Psychology is most likely a new subject for you and the following tasks have been designed to help you to make a strong start.

**Task 1:** Watch the Crash Course Psychology preview

<https://www.youtube.com/watch?v=vo4pMVb0R6M&list=PL8dPuuaLjXtOPRkzVLY0jJY-uHOH9KVU6&index=2&t=16s>

**Task 2:** (type up your answers) What do the following terms mean?

- Psychology
- Obedience
- Conformity

**Task 3:** (type up your answers) What are the differences between laboratory, field, and natural experiments?

**Task 4:** Check out the articles on the **BPS Research Digest**. Website:

<https://www.bps.org.uk/collections/research-digest>

The British Psychological Society (BPS) is the organisation in charge of the rules psychologists must follow when they are conducting their research. The BPS also keeps a record of all the professional psychologists working in the UK. The BPS produces a summary of some of the most interesting research each fortnight called the **BPS Research Digest**.

**Find one article from the BPS Research Digest that interests you and write a summary of the article. Remember to look up any words that you do not understand.**

Make sure that you have your transition work ready to hand in for your first Psychology lesson in September.

If you have any problems with the Psychology transition work, please contact the Mrs Sparrow ([elizabeth.sparrow@astrea-longsands.org](mailto:elizabeth.sparrow@astrea-longsands.org))

We look forward to seeing you in September!
